## WHAT IS DROP STITCH?

Drop stitch is an amazing material, originally used for military applications. It's lightweight, perfectly flat and rock-hard rigid when inflated for peak performance. It can also be quickly deflated for compact storage and quickly redeployed.

So, how is this possible? Millions of strong, thread-like fibers connect the top surface to the bottom surface. A sophisticated weaving machine is used to produce this fabric, a marvel of complex engineering. AIRHEAD SUP has perfected the latest improvement in drop stitch quality and engineering, X-CROSS Technology. X-CROSS equipped ISUPs are 20% stronger and stiffer than other drop stitch construction without any weight gain.

6in. Dot Precision Drop Stitch Inflatable Chamber strengthened by thousands of tensile filaments using **X-Cross Technology**

The Air 7 fin provides unequalled race performance in the water.

# BLING

## REFLECTIVE TOW LINES THAT ILLUMINATE IN HIGH AND LOW LIGHT CONDITIONS

Everyone will agree that early mornings or evenings on the lake are the best times for watersports. The water is calm and you get that chance to go play on some "glass". The downside is that the lighting is not so ideal. With that in mind... Kwik Tek is proud to offer a revolutionary new product "BLING". BLING is the first tow/wakeboard/ski rope of its kind to have reflective materials woven right into the braid. When the light hits the reflective elements the BLING comes alive. The added bonus of being able to easily see your tow line, is a crucial safety component for all watercrafts and the person(s) in the water.

## HH-P1B HULL HUGR PWC FENDER

Docking a PWC has never been safer with the introduction of the HULL HUGR PWC Fender. Engineered specifically for PWCs, it hinges in the center to better protect PWC's body from docks designed for bigger boats. It hooks under the rub rail with a molded acetyl hook integrated into the back of the fender. If your PWC has them, you'll want to connect the top of the fender to a cleat or ski eye with the adjustable strap and vinyl dipped steel hook provided. If not, simply thread the strap through the rubber block provided and place it inside the PWC's storage compartment, then shut it. The block holds the strap perfectly and will not damage the body. We recommend 2 fenders per PWC.

A ratchet is the only way to get your PWC tied down to the trailer tight with only one tie down. 3 coated hooks, a "soft hook" and the 8 ft. length make this the universal tie down for all PWCs and trailers.

Color: Black.

### TS-15 PWC Tow Strap with Mesh Bag

There's a 10" loop at each end and one integrated detachable stainless steel carabiner. Towing watercraft with recessed bow eyes is easy with this Tow Strap. 15 ft. long.

### TR-20 PWC Tow Rope

This 20 ft. tow rope has a heavy-duty carabiner at each end. The 12" long "soft hook" is perfect for easy hook-ups to recessed bow eyes and doubles as a rope wrap for neat storage. The 3/8" diameter purple/yellow/red rope is UV, mold and mildew resistant and color coordinates nicely with most PWC's and jet boats.

### A-1 PWC Sand Anchor & Buoy

A sand anchor is ideal for anchoring PWCs in shallow water to keep the impeller off the beach. Fill this super durable tri-laminate anchor bag with up to 35 pounds of rocks or sand. A buoy marks the anchor's location. Tie-ups are easy with the 6-foot long rope and the oversized finish-friendly acetyl snap hook.

### IP-24 Impeller Protector

Keep ski ropes away from your PWC's impeller and protect passengers from ski rope kick-back. Simply run your ski or tube rope through the middle of the impeller protector. Then attach the rope and straps to your ski tow eye. Black nylon covers the 24" long closed cell foam tube.

## SB-4 PWC Fenders

Personal watercraft require specialized fenders to prevent damage from floating underneath docks designed for boats. These 3" x 18" fenders have nylon covers and attach to PWC's with 2 giant suction cups or secure under your hood and seat. Great for docking, rafting boat to boat, PWC to boat, or PWC to PWC. 2 per Package. Color: Black

## A-5 Lightweight Fluke Anchor

This vinyl-dipped fluke anchor weighs only 1-3/4 pounds, and won't scratch finishes. Perfect for the temporary mooring of PWCs and other small craft, a 25 foot marine-grade rope is spliced to it. A sturdy nylon case is also included for convenient storage.

## A-2 Complete Folding Anchor System

This complete anchor system is in a class by itself. The 3-1/3 pound 4-fluke folding anchor will hold in mud, sand, gravel and rock. It's designed for the temporary mooring of small boats, sailboats, personal watercraft, inflatable boats, canoes and float tubes. The anchor is coated to protect finishes. The durable nylon storage case is padded for added protection and to dampen noise while the anchor is stowed. Fits under most boat seats, in PWC storage compartments, or in PWC storage canisters! The 25 ft. long marine-grade rope, with an in-line buoy, is spliced to the anchor and a heavy-duty stainless steel snap hook.

## AHAB-2 Anchor Bungee Lite

Now you can tether your PWC off shore so you don't have to risk damage from a rocky shore line. When you attach your anchor to an Anchor Bungee Lite you are able to set the anchor 15' to 22' off shore and still be able to pull the PWC close to shore to unload. Once you release the PWC the Bungee will pull the PWC away from shore and you just need to tether the PWC on shore. Anchor Bungee Lite takes the shock out of your anchor line and makes it much easier to anchor offshore. The Anchor Bungee Lite stretches, while your anchor stays set. It has a much stronger tensile strength than others and is much more visible with the bright color scheme we offer. AHAB-2, Stretches from 7' to 22'

## A-3 Screw Anchor System

Perfect for anchoring a PWC in shallow water, just off the beach. Screw the zinc-plated anchor into compacted sand or mud in 2 to 3 ft. of water. There's a giant nylon snap hook at each end of the 8 ft. long marine grade rope. Snap one to the screw anchor and the other to your PWC or small boat. A padded nylon storage case protects watercraft and dampens noise while stowed.

## TD-2 Personal Watercraft Cover Tie Down Kit

Whether your cover has tie down loops or not, it will be ready for trailering down the highway with this one-size-fits-all tie down kit. The side release buckles are perfect for quick and easy covering, removing and tightening. For covers with loops, you'll run the straps under the belly of the personal watercraft and the straps will stay attached to the cover even when you remove it. For covers without loops, the tie down straps go up over the top and are anchored by 4 hooks that fit under the side rails. 1 pair per package, includes 4 heavy-duty straps, 2 side release buckles, 4 strap retainers and 4 hooks.
