Materials: 15 cm thick dropstitch South Korean 1st quality and Technology F.C.T (Fusion Core Technology). (30% lighter than basic sups)

A central drift US box with quick-mounting screws.

EVA style Teak pad

Multiple padded and comfortable handles with ANONYM™ plastic tags.

Valve in the front to better inflate and deflate.

The "True Track" system limits the row effect (zigzag) and ensures a speed gain by breaking the swell.

Included in the pack: COMPLETE PACK

1 soft center drift US box "without tools" typed Race.

1 adjustable aluminum paddle.

1 leash.

1 repair kit.

1 double action high pressure 20 PSI double action pump, then single action with integrated nanometer.

The Zodiac™ carrying bag.

Construction :

This inflatable stand up paddle (SUP) is designed with Fusion technology (F.C.T).

It comes from the latest high-end dropstitch gluing techniques.

Its two layers of PVC are assembled by fusion and not glued.

It's an industrial process that allows you to have:

- A lighter inflatable board of 30%.
- > Weight gain of about 4 kilos on a board of the same size.
- 30%More rigid.
- While eliminating 85% glue compared to a glued double layer paddle.

Less glue for a better product !
